THE SOHO TILE COLLECTIONS

To delight & inspire

The relationship with one's own home is a very special one. No other place has the same kind of impact on well-being and 'joie de vivre'. This is precisely why we attach importance to designs that meet the wide range of requirements involved. Simple and purist, elegant, opulent, colourful, cosy or classic? Or perhaps a deft blend of different things?

The Soho Tile Collections offer those in search of an individual attitude towards life pure inspiration in these wide-ranging tile collections from Villeroy & Boch. They offer ideas and suggestions that open up unexpected vistas on interior design. For houses and flats that reflect life's variety and a fresh self-image

Advantages of ceramic tiles

Good for health

Ceramic tiles are simply ideal for a healthy living environment. Whether glazed or unglazed, their surfaces are highly impervious. Mites and other microorganisms that cause a large number of allergies don't stand a chance. Ceramic itself does not give off any vapours or smells and, for this reason, is also recommended in terms of building biology.

Energy-efficiency saves costs

For underfloor heating there is no better covering than ceramic, which boasts good thermal conductivity and heat storage capacity and is also anti-static. A pleasant and efficient side effect: on hot summer days, tiles also help to keep things cool.

Barrier-free living and design

Today, bathrooms in particular should not have any unnecessary thresholds. Tiles and mosaics are perfect for barrier-free, walk-in and wheelchair-friendly showers and baths. Provided with non-slip surfaces, tiles also ensure a secure footing.

Safety underfoot

Vilbostone porcelain stoneware tiles make ideal floor coverings for both indoors and outdoors. It is precisely here that the non-slip properties of tiles come into their own, offering a secure foothold, even when it's wet.

Frost resistance

Vilbostone porcelain stoneware tiles are frostproof and weather-resistant when laid professionally and therefore also suitable for use in outdoor areas.

Environmentally-friendly and natural

The high quality of Villeroy&Boch tiles in terms of both workmanship and product concept ensures the necessary durability and sustainability. They are made of natural components that occur naturally in almost unlimited quantities. They are also manufactured by means of environment-friendly processes and a large proportion of the production waste is recycled. Tiles can also be disposed of in an environmentally safe manner.

Easy care

Tiles are naturally hygienic and easy to clean. The cleaning methods and cleaning agents must thus be adapted to the type of floor and local conditions.

Colour-fastness

Tiles are colour and lightfast and their appearance will not even be affected by exposure to direct sunlight.

Their good looks are undiminished over time

Tiles from Villeroy&Boch are durable and do not wear down, even after decades of use. They are largely scratch- and crack-resistant. Falling embers from open fires, stoves or cigarettes that will cause lasting damage to other floor coverings can be removed without a trace from tiles.

Aesthetic selection available to cover all tastes

There are an unlimited number of colours, designs and finishes. As design media, they offer solutions for every style and taste. Tiles cannot be considered in isolation here, but form an integral part of the overall design scenario and are of crucial importance to the room concept and a harmonious interior.

INNOVATIONS, *that make living with tiles* EVEN BETTER.

VilboStone

Versatile and functional

VilboStone porcelain stoneware permits a wealth of different surface designs featuring unusual colour and sheen effects. VilboStone porcelain stoneware is available both glazed and unglazed, with a matt, polished, rough-polished or relief surface finish and in various classes of slip resistance.

Tiles of this quality are resistant to chemicals, colour and light-fast and feature impressive with highly resistant properties for indoor and outdoor areas.

VilbostonePlus

Insusceptible to staining and soiling

During the manufacturing process for coloured porcelain stoneware, the unglazed ceramic is provided with the VilbostonePlus finish, markedly reducing the tiles' susceptibility to staining and soiling.

The porcelain stoneware produced with VilbostonePlus ensures high resistance to mechanical strain, chemicals, wear and abrasion and is particularly easy-care.

Easy to clean and hygienic

CeramicPlus

The nonvitreous wall tiles are manufactured with CeramicPlus, a surface finish offering lasting easy-care properties. Impurities and dirt roll off of this dirt-resistant surface in large beads, with little chance of adhering to the tiles.

Cleaning often calls for nothing more than water and a cloth, making aggressive cleaning agents unnecessary.

Looking after our planet

Acting in harmony with Nature is a clear priority for V&B Fliesen GmbH. Our daily business is based on extremely high standards where quality, efficiency and environmental friendliness are concerned, and we can only preserve what we love for future generations by treating our environment with respect.

That's why we think it's important to be on the cutting edge. Not just with regard to tile technology, but above all in terms of environmental protection!

V&B Fliesen tiles have been awarded the Environmental Product Declaration (EPD) label by the IBU (Institut für Bauen und Umwelt e.V.). The Environmental Product Declaration provides relevant, verifiable and comparable information on the environmental impact of products.

This certification allows architects and planners to utilise our products in all properties that have been certified as satisfying the BREEAM, LEED, DGNB or other comparable international requirements for sustainable building.
