

Alku®

more than bedrooms
Summer 2024

Alku (Finnish)

Noun

1. A start, beginning, inception, incipience.

A new beginning is an exciting time, a chance to be fresh, bold, different and adventurous. Alku was created to be all these things, we are not content with following the trend, we want to be new, setting trends for others to follow.

Manufactured in the UK to the highest standards we only use the finest hinges, drawers and accessories available, giving you confidence your bedroom is a part of your life for years to come.

Alku has something for everyone, come discover the perfect bedroom for your new beginnings.

Aluminium Doors

Elevate your bedroom with the sophistication of our aluminium doors.

Choose from two stunning glass options: smoked mirror for a touch of glamour or smoked tinted glass for a hint of mystery. Combine these doors with strategically placed lighting to create a truly elegant and moody atmosphere, perfect for relaxation.

Arendal

Simple yet elegant, this flat panel door with a large radius edge creates a soft and inviting look.

Boras

Offering unparalleled choice and class, the Boras door is available with three stunning glass options: Clear, Three Panel Circle Fretted, and Four Panel Cross Fretted. A moulded plinth completes the luxurious look.

Eslov

Exuding soft elegance, the Eslov door showcases a wide shaker frame and a beaded detail gracing the center panel.

Hamar

Embrace a modern farmhouse aesthetic with the Hamar door. This contemporary take on Shaker design features a slim frame, creating a clean and airy feel in your bedroom. The tall doors boast a distinctive cross rail, adding a touch of visual interest.

Kalle

The Kalle door features a wide shaker frame with a classic cock bead detail, lending timeless elegance to any bedroom.

Laguna & Lesini

Contemporary and elegant mix of our Laguna matte finish coupled with Lesini Elements range or add simplicity and choose just one of the many decors available.

Lovel

This simple but elegant ultra matte finish door is smooth to the touch and offers many colour combinations. Offered to maximise the space in any room.

Lucid

Representing pure luxury with its deep reflective surface this glass-like sister to the Lovel bedroom makes for a bright and luminous room.

Rauma

This sleek single-panel door offers increased design flexibility. Its unique feature, a rebate set on the outer rail allows for handle placement on taller doors, creating a clean and contemporary look.

Salo

With its unique reeded effect grooves, the Salo door creates a captivating play of light and shadow, adding a touch of modern intrigue.

Shaker no Grooves

A perennial favorite, the Shaker door defines timeless design. Its clean lines and wide rails create an enduring elegance that complements any bedroom style.

Siljan

A classic three-panel door featuring decorative moldings adds a touch of country manor charm.

Tonsberg

The perfect complement to a loft dwelling, the Tonsberg slab door features a unique handle detail. When mixed with full glazed black aluminum doors, it creates a truly uber-modern feel.

Tornio

Offering timeless sophistication, the Tornio boasts classic panels, a double outer step, and a raised center panel.

Cabinet & Door Care and Maintenance

With the appropriate care and maintenance our kitchen doors and components are designed to provide many years of reliable service. To help keep it in the best possible condition please follow the simple guidelines below.

INSTALLATION ADVICE

Pre Installation

Ensure that all new-builds or newly plastered rooms have been left to environmentally stabilise prior to the installation of new kitchen doors. Kitchen doors must not be installed into a damp, or moisture-rich environment as it will cause undesirable movement in the joints and panels of the door. A hygrometer should be used to assess conditions.

To help minimise any potential damage to the kitchen whilst you are installing it, please read and adhere to the following instructions and recommendations:

- We would advise that you make an initial check to confirm that you have the correct quantity and sizes of fascias; you can do this by referring to the labels attached to the outer packaging.
- The fascias should be stored flat and away from the working area. Take extreme care when stacking the fascias with hinges attached to ensure that the hinges do not mark other fascias. Do not lean the fascias against one another, or against any surface without proper protection in-between.
- Ensure that you fully inspect each individual fascia prior to attaching the hinges. Claims for damage to the fascia will not be accepted after the hinges have been attached.
- Take extreme care when unpacking the fascias and do not use sharp blades to cut away the packaging.
- When attaching the hinges, place the fascia face down on a soft clean surface, ensuring that there is no grit, sawdust or other matter underneath that could damage the surface of the fascia whilst the hinges are attached. It is good practice to place a sheet of clean cardboard between the fascia and the flat surface prior to attaching the hinges.
- If the hinges are 'knock-in' type, use a rubber mallet to knock the hinges into the fascia without using excessive force.
- Once the hinges have been attached to a door, hang the door on the unit straight away to avoid damage. Do not stack the doors with the hinges touching other doors, as this can cause scratches or marks to the other fascias.
- Do not stack the doors on their ends on any hard surface; this can cause chipping and scratching along the edge of the fascia, especially on the handle edge of ranges with an integral handle. Prior to fitting, the fascias should be stored flat, ensuring that they are not resting on any dirt or debris that may damage or mark the finish.
- You should take extreme care not to put the door down with excessive force on any edge, especially the handle edge, as this will cause crushing/impact damage on these edges.
- Take extreme care not to put the door down on any hard or rough surface such as bare concrete floors, or on any debris such as sawdust, grit or screws, as this can damage the product.
- If the fascias are attached to the carcass, then you should carefully remove the fascias by unclipping the hinges, and storing these flat in a clean safe environment away from your working area, utilising the packing materials from the units.
- Where cutting/scribing décor panels and trim, you must use a sharp quality saw blade of the appropriate grade for fine-cutting, or a suitable router. Small chips can appear along the cut-edge, and so extra care must be taken to minimise the risk of chipping. Using a blunt or inappropriate saw blade will produce a poor finish, and this will not be covered by the guarantee.
- On Painted Products: Any fine chips along the cut edge should be smoothed with a fine grade sand paper prior to fitting.
- All cut edges should be sealed against moisture ingress using a suitable water resistant sealant/adhesive prior to installation.
- All trims are supplied in long lengths and need to be cut down on site, and again it is important that this is done using the appropriate tools.
- When fitting the plinth, ensure that you check the dimensions of any adjacent appliances. On occasion, the plinth may need to be pulled forward to ensure that it clears the front of the appliance. This can be achieved by fitting blocks using off-cuts to the rear of the plinth prior to attaching the plinth clips, to step the plinth forward from its normal position.

General Care

As with all kitchen furniture the most common problems found occur as a result of excessive or prolonged exposure to heat and/or moisture. Always ensure that water is not left around sink areas as damage caused as a result is not covered by the guarantee.

Always wipe off excess moisture and be careful with extreme heat sources, such as kettles, ovens and toasters. It is recommended that these heat sources are not placed directly under wall units when they are in use; they generate a higher level of heat and moisture than is often appreciated and can quickly and easily lead to damage of the furniture.

Don't place appliances that create steam (e.g. steamer, coffee maker or kettle) underneath the cabinets so that the steam flows up against the underside of the cabinet and doors.

If using glass cleaner to clean your glass doors be careful not to damage the finish of the door and cabinet parts while cleaning. Do not spray glass cleaner directly on to the glass or cabinet parts as this may discolour the finish of your kitchen cabinets. Instead, spray a small amount of cleaner on to a lint free cloth or paper towel then wipe the glass.

Don't open the door of the dishwasher immediately after the programme has ended, as exposure to heat and the high humidity increases the risk that the door may absorb moisture and swell.

Please note that after a period of time it is quite normal for the colouring of kitchen units to mellow in colour. This is not a manufacturing fault and is as a result of exposure to light. This means that any additional parts subsequently ordered for your kitchen, or supplied as replacements may not be an exact colour match. However any additional parts supplied will also mellow over time to blend with your existing units.

The colour of doors and drawer fronts may appear mismatched in colour. This apparent mismatch is sometimes the effect of differing light conditions within your kitchen, (known as metamerism). To check your doors and fascia you should place them side by side in natural daylight for comparison.

Cleaning advice for all door types including timber, painted & foil

- Do not use wax-furniture polish, abrasive or aggressive cleaners, bleach or other hypochlorite (chlorine) based cleaners, multipurpose cleaners, dilutes, acetone, alcohol, solvent or similar products on the door, as this will damage the surface; additionally wax and polishes leave a residue build up that is difficult to remove.
- Only use a 5% soap, 95% water (liquid soap) solution, wiping with a damp (not wet) cloth, finally drying with a soft clean cloth.
- Ensure all cooking splashes are wiped immediately with a damp cloth; and dust with a soft cloth only.
- Never use any abrasive pads or abrasive cleaners on the furniture. Spills and condensation on the fascias/panels should be cleaned and dried immediately.

Foil & High Gloss Finished Doors

Foil/Lacquer coated products are manufactured from the highest quality materials. Please be careful not to puncture the foil/melamine lacquered surface of your panels. These should be kept dry in order to prevent moisture ingress.

Your gloss doors will come with a protective film over the front. You should remove this only after they are installed as the curing process continues for around 72 hours after the film is removed. This means the doors will be liable to scratching and other marks. You should avoid cleaning the doors for at least a few days to prevent any marks appearing on the surface.

You should clean the doors with a soft damp cloth and a mild detergent. Never use any harsh or abrasive cleaners as this may damage the gloss surface of the door. Normal cleaning and polishing may leave minor scratches on the surface of the door, which is quite natural.

Moisture: Periodically clean the interior and exterior surfaces of the door using a soft, damp cloth. Wipe dry all surfaces after cleaning.

Use only cleaning agents that are intended for the materials used in your kitchen. Avoid any agents that contain ammonia, alcohol, bleach or an abrasive.

If the surface of the product is exposed to any oil based substance (for example olive oil, butter, margarine or cooking oil), the spillage must be wiped away immediately to prevent staining. Grease marks caused by these oil-based products can easily be removed by use of a mild detergent, non-abrasive cleaner if used immediately after spillage has happened.

Abrasive cleaners are not recommended for this type of product. Do not expose the doors or panels to a temperature in excess of 60°C (140°F).

Light: If the doors are supplied with a protective film on the face they must not be directly exposed to sunlight. Once installation is complete, carefully remove the protective film from the front of the fascia. We also advise that colour change is taken into consideration when replacing or fitting new doors some time after the original kitchen has been installed.
